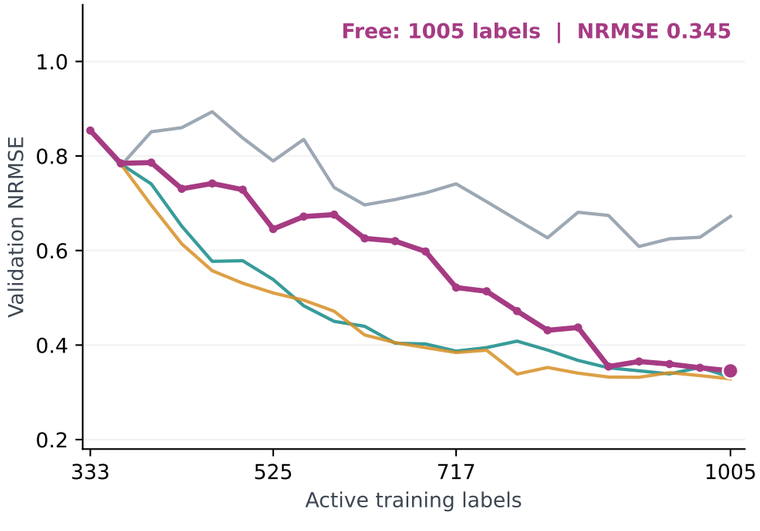
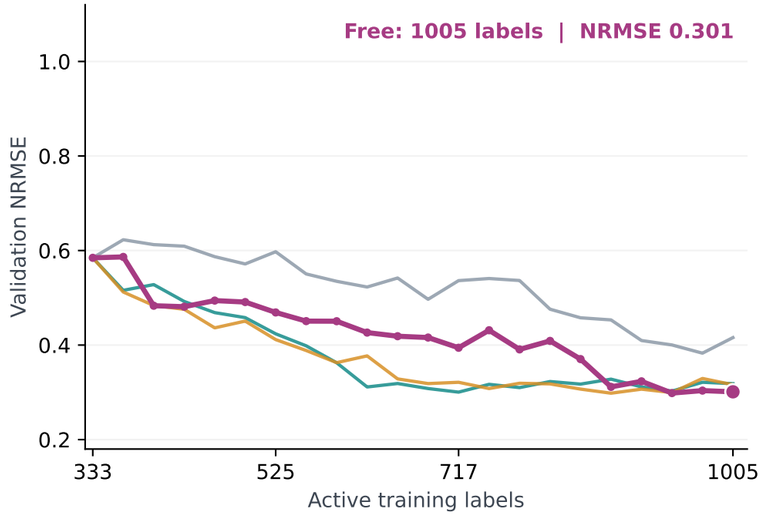
Free LLM vs. traditional methods | five seeds completed to 1005

Random32 · LCMD32 · Traditional Hybrid32 · Free LLM32

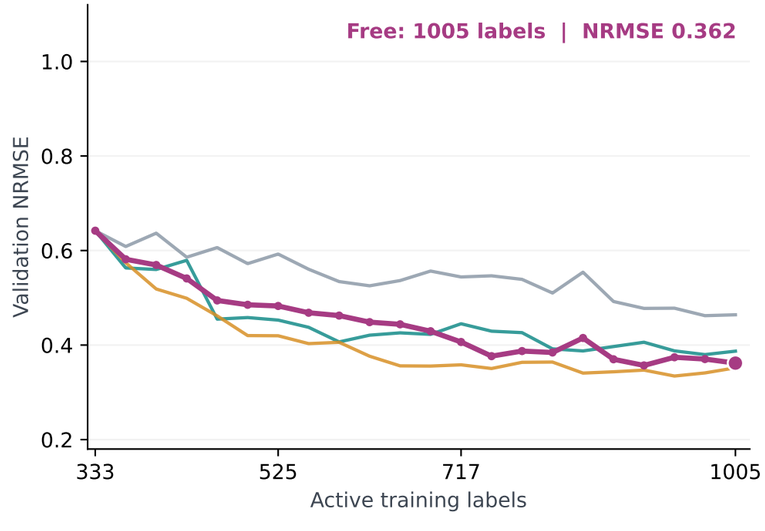
A Seed 157



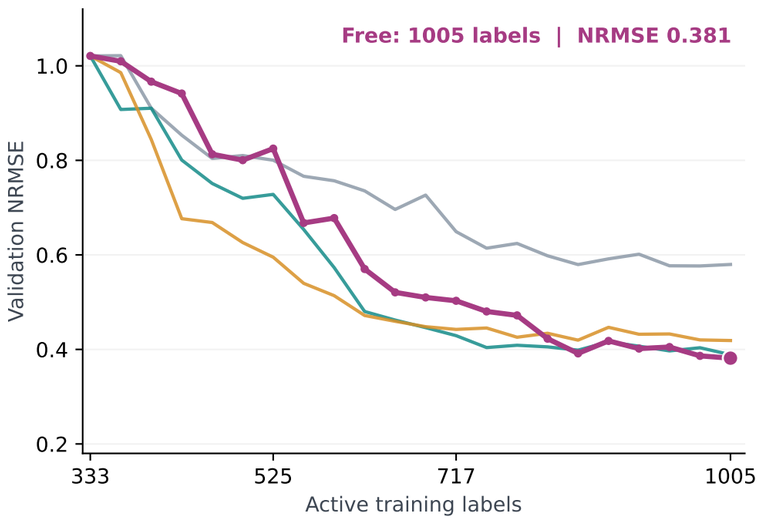
B Seed 887



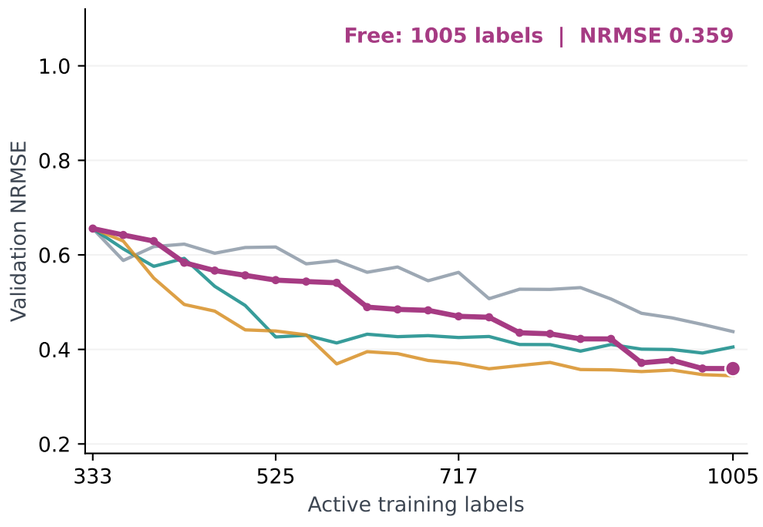
C Seed 2357



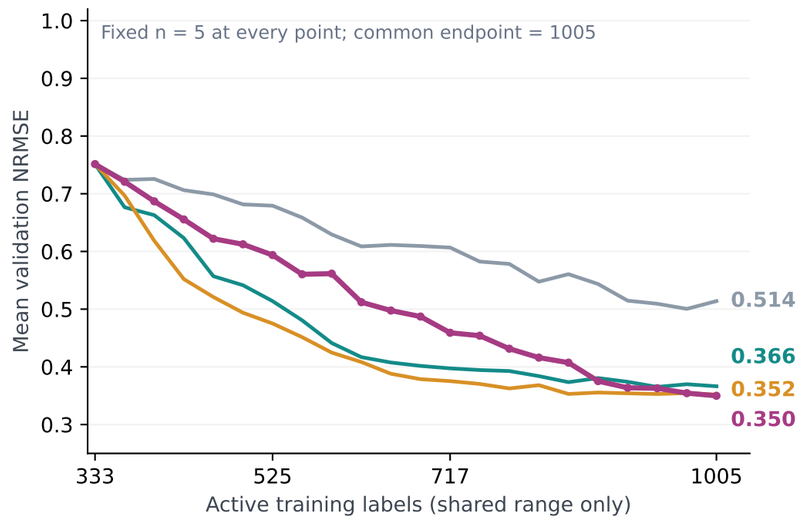
D Seed 6101



E Seed 12203



F Matched comparison: all 5 seeds



Lower is better. All curves use verified frozen fits and the same initialization and validation split within each seed.
Historical seed 157/6101 retain Astra/high prefixes. Seeds 887/2357/12203 use Sol6.1/xhigh throughout.
Panel F compares the same five seeds at every budget (333–1005); validation only, no test evaluation.
