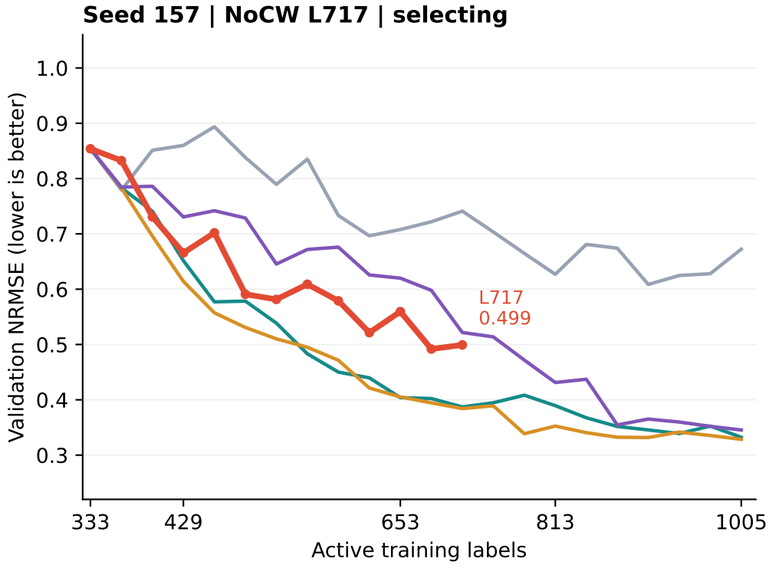
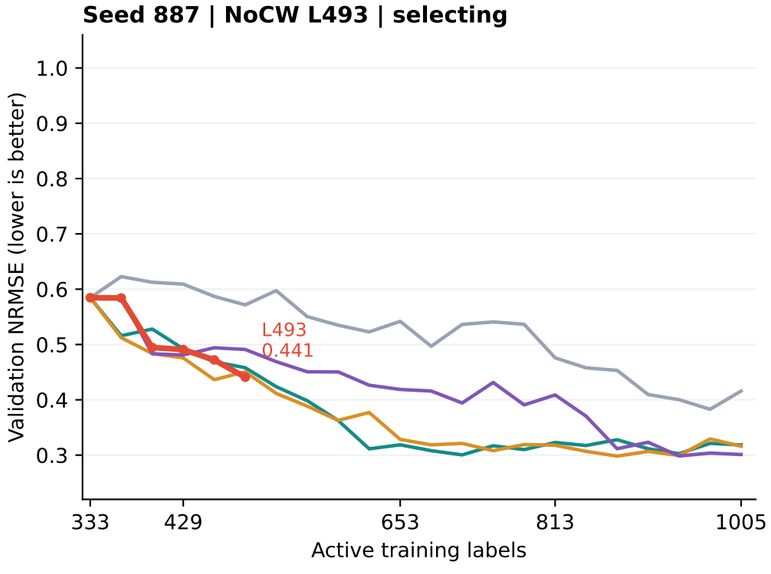
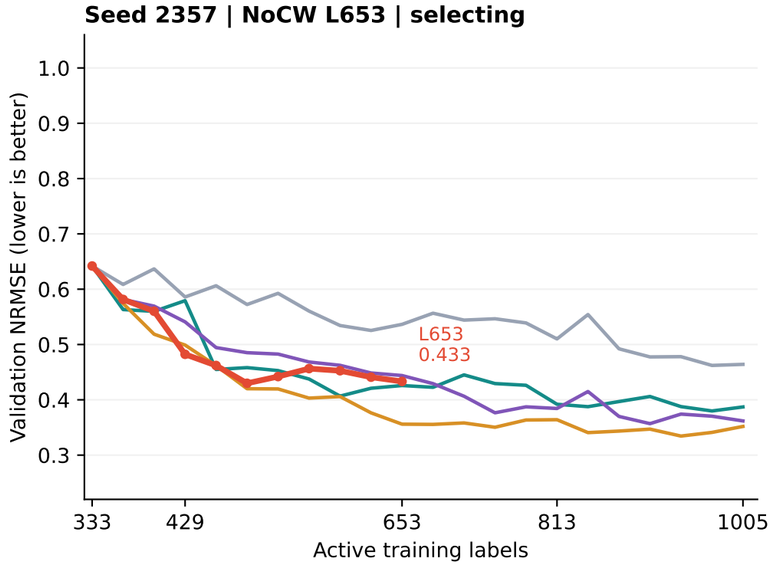
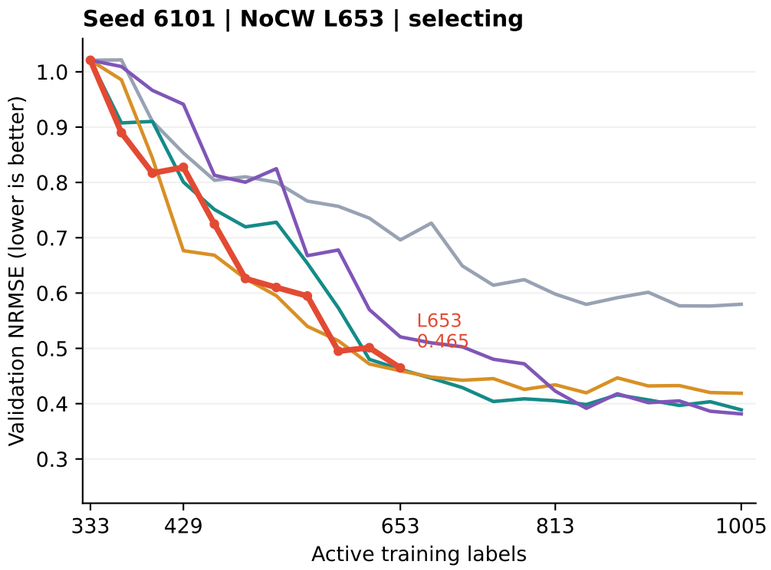
NoCW LLM32 vs existing methods | frozen validation progress

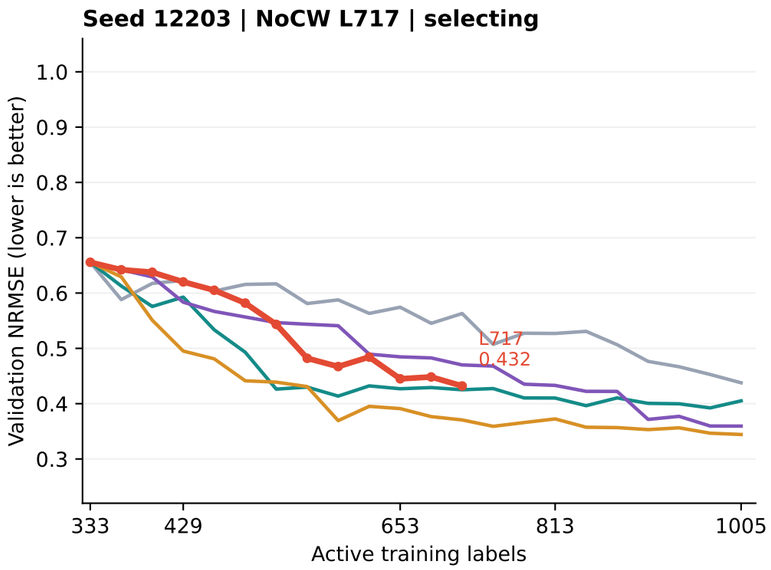
Random32 · LCMD32 · Hybrid32 · Free LLM32 (CW-aware) · NoCW LLM32

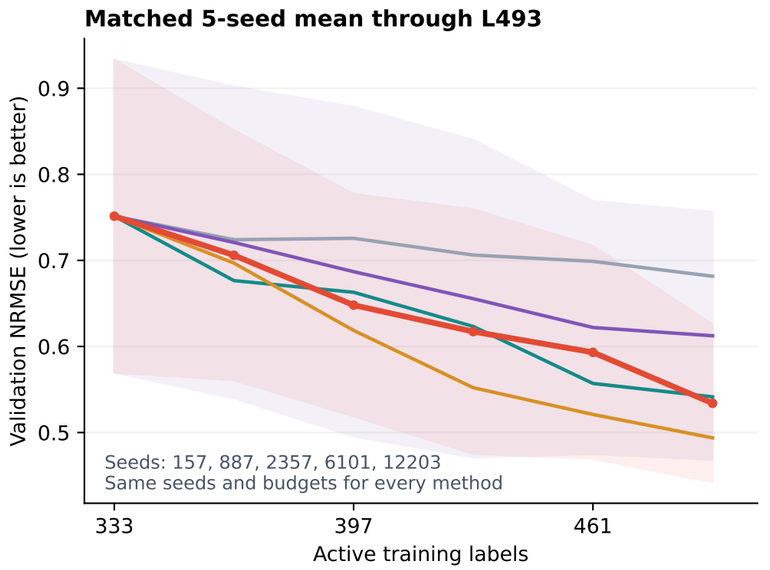












NoCW lines end at completed frozen fits; no extrapolation or replacement of stopped seeds. Shading: mean +/- SD for the two LLM methods.
Historical Free LLM reference: seeds 157/6101 retain Astra/high prefixes; NoCW uses gpt-6.1-sol/xhigh throughout. Descriptive comparison, not a newly paired causal result.
Validation only; no test evaluation or selector feedback from these plots. Snapshot: 2026-10-30T15:21:13+08:00
